Chennai, India | Open to relocation | Requires employer visa sponsorship

PROFILE SUMMARY

Java Backend Engineer with 4+ years of experience building scalable, high-availability microservices for enterprise clients in Financial Services and Automotive Lending. At Zemoso Technologies, led backend development for the eBay Co-Branded Credit Card platform — designing RESTful APIs, integrating real-time credit decisioning systems with Bread Financial, and reducing average API response times by 35%. Previously at Cognizant Technology Solutions, delivered production-grade Java/Spring Boot applications for Ford Credit, owning API development, database schema design, security tooling, and test automation. Proficient in Google Cloud Platform (GCP), Docker, Jenkins, CI/CD pipelines, and Agile delivery. Seeking backend engineering roles internationally with employer visa sponsorship.

SKILLS

- **Languages:** Java 8, 11, 17, 21
- **Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, OAuth2, JWT, Hibernate, REST APIs, Microservices, RabbitMQ
- **Testing:** JUnit, Karate Framework, TestNG, API Automation, End-to-End Functional Testing, Regression Testing
- **Databases & Caching:** MySQL, PostgreSQL, Redis
- **Cloud & DevOps:** Google Cloud Platform (GCP), Cloud Pub/Sub, Docker, Jenkins, Cloud Build, CI/CD Pipelines
- **Code Quality & Security:** SonarQube, Checkmarx, 42Crunch, Fossa, Cycode
- **Developer Tools:** Git, GitHub, IntelliJ IDEA, Cursor, Maven, Gradle, Postman, DataGrip, PgAdmin, MySQL Workbench

WORK EXPERIENCE

SOFTWARE ENGINEER III, ZEMOSO TECHNOLOGIES

April 2026 – Present

Project: eBay Co-Branded Credit Card (CBCC) | Client: eBay

End-to-end credit card onboarding platform for eBay customers supporting Prescreen, Prequalification, and Instant Credit journeys. Integrated with Bread Financial for real-time credit decisioning, Virtual Account Number (VAN) provisioning, and post-approval customer communications.

- Developed and enhanced **15+** RESTful APIs and microservices using Java, Spring Boot, and Hibernate to support customer onboarding journeys, including Prescreen, Prequalification, and Instant Credit flows.
- Integrated **10+** Bread Financial APIs for real-time credit decisioning and issuer response handling, increasing transaction success rates by **30%** across all onboarding journeys.
- Designed and implemented business workflows for customer consent, disclosures, and financial information processing, reducing onboarding completion time by **25%**.
- Optimized API and database performance, reducing average response times by **35%** and supporting high-volume customer application traffic.
- Delivered **100%** of sprint commitments across **10+** Agile release cycles, collaborating with product, QA, and client stakeholder teams to align feature delivery with business requirements.
- Led root cause analysis for critical production issues, resolving **95% of incidents within SLA** and ensuring uninterrupted customer onboarding experiences.
- Implemented comprehensive logging and monitoring strategies, reducing troubleshooting time by **40%** and improving production stability.
- Contributed to **20+** technical design and architecture reviews, shaping scalable microservice design patterns for high-volume customer onboarding workflows.

SOFTWARE ENGINEER, COGNIZANT TECHNOLOGY SOLUTIONS

July 2022 – April 2026

Project: Ford Credit – FOBOS | Client: Ford Motor Credit Company

Automotive lending platform for Ford Credit enabling dealers to submit, manage, and track vehicle purchase proposals through the Central Auto Purchase (CAP) system, handling new and used vehicle inventory and pricing workflows.

- Diagnosed and resolved production bugs across the FOBOS platform, reducing system defect rate by **25%** through root cause analysis and targeted code fixes, improving overall platform reliability.
- Coordinated across engineering, QA, and product teams to align delivery milestones, improving sprint completion rates by **40%** and maintaining consistent on-time delivery for the Ford Credit FOBOS platform.

- Enhanced platform security by integrating 42Crunch, Cymark, Checkmarx, and Fossa into the CI/CD pipeline, reducing security vulnerabilities by **60%**.
- Increased unit test coverage from **50% to 90%** using JUnit and SonarQube, reducing code quality violations by **80%** and strengthening confidence in production deployments.
- Designed database schemas to support new application features, improving data retrieval speed by **35%** and reducing query load on the system.
- Monitored application performance for production support using Cloud Build metrics and Dynatrace, identifying bottlenecks and improving response times by **25%**.
- Designed and developed RESTful APIs using Java and Spring Boot for dealer proposal workflows in FOBOS, reducing average API response times by **30%** through optimized data access patterns.
- Built a comprehensive API automation test suite using Karate Framework and TestNG, achieving end-to-end functional validation across all platform workflows and reducing manual regression testing effort by **40%**.

INTERN, COGNIZANT TECHNOLOGY SOLUTIONS

February 2022 – July 2022

- Built an Employee Management System using Spring Boot and Hibernate, implementing CRUD REST APIs, role-based access control, and database schema design as a functional end-to-end backend project.
- Deepened expertise in Spring Boot, Hibernate, and SQL through applied project work and shared technical insights with team members to support collective upskilling.
- Facilitated weekly progress meetings for a team of four interns, improving collaboration and accountability to consistently meet project milestones.

EDUCATION

- **Bachelor of Engineering (B.E.) in Computer Science and Engineering (CSE)**
Velammal Engineering College (Anna University Affiliated) | CGPA: 8.34/10 | 2018 – 2022

ACHIEVEMENTS

- Received the '**Rising Star**' Award from Ford Credit (client) while deployed as a Cognizant Technology Solutions consultant, recognised for high-quality backend delivery, production support, and cross-team collaboration.
- Recognised by leadership for mentoring new joiners, improving onboarding speed and overall team productivity.

CERTIFICATIONS

- [Google Cloud Platform \(GCP\) Associate Cloud Engineer – Exam Preparation | Udemy | Nov 2024](#) – Cloud infrastructure, deployment automation, IAM, networking, and cloud operations.
- [Spring Framework & Spring Boot Certification | Udemy | Aug 2022](#) – Enterprise application development, RESTful APIs, Microservices, Spring Security, and Data Access.
- [Claude with the Anthropic API – Course Completion | DeepLearning.AI / Anthropic | Apr 2026](#) – Generative AI, prompt engineering, AI-assisted software development, and workflow automation.
